Palakkad, Kerala, India

SUMMARY

Cybersecurity Analyst with hands-on experience in vulnerability assessment, penetration testing, and security governance. Skilled in identifying and exploiting weaknesses across web, network, and Active Directory environments using both automated tools (Nessus, OpenVAS) and manual techniques. Experienced in AD security, including GPO reviews, privilege audits, and hardening. CEH and CPT certified, currently pursuing an MSc in Cybersecurity. Active in bug bounty platforms such as HackTheBox, TryHackMe, and PortSwigger, with strong proficiency in Nmap, Burp Suite, and Metasploit. Also experienced in GRC functions, including risk assessments, policy development, and compliance alignment (ISO 27001, NIST CSF), with the ability to translate technical findings into business-focused recommendations.

EXPERIENCE

OCT 2025 - Present

Mirox Cybersecurity PLTD
Techno Park, Trivandrum
kerala

Cybersecurity Analyst

- Conducted AD testing and hardening, including GPO review, privilege checks, and baseline configuration audits.
- Executed compliance and config reviews using Nessus, OpenVAS, and manual verification.
- Assisted in system hardening using CIS benchmarks, helping reduce recurring issues by 30
- Performed detailed web application penetration testing using OWASP Testing Guide.
- Risk assessments and gap analyses aligned with ISO 27001 and NIST CSF security frameworks.
- Developed and reviewed security policies, SOPs, and compliance documentation for internal governance.
- Conducted evidence collection and audit support activities for internal and external compliance audits.
- Mapped technical vulnerabilities to business impact, ensuring alignment with organizational risk appetite.
- Supported creation of security metrics and dashboards for management reporting and compliance tracking.
- Participated in vendor risk assessments, reviewing third-party security controls and compliance posture.

Mar 2023 – Jul 2023

Consyst Digital
Aluva , Kochi, Kerala

OT- Cybersecurity intern

- Assisted in securing Operational Technology (OT) systems within an industrial environment by identifying vulnerabilities and supporting mitigation efforts.
- Contributed to system hardening, network segmentation, and access control implementations to enhance industrial network security.
- Supported security monitoring and incident response processes for OT infrastructure.

EDUCATION

Aug 2023 - Apr 2025	Master of Science in Cybersecurity Bharathiar University
Aug 2019 - Apr 2022	Bachelor of Science in Computer Science Calicut University

ACHIEVEMENTS

- Earned \$50 bounty for an authentication issue in forgot password flow.
- Reported other bugs - identified as duplicates.

CERTIFICATIONS

- Ethical Hacker (CEH) – EC-Council
- Certified AppSec Practitioner (CAP)
- Honors Diploma in Computer Hardware and Networking
- ISO/IEC 27001 Information Security Associate
- Certified Penetration Tester (CPT)
- Web Application Pentesting and Bug Bounty

SKILLS

- Vulnerability assessment
- Penetration Testing
- Active CTF player
- OWASP TOP 10
- GPO Review
- CIS Benchmark
- Network security
- Bug bounty
- Python
- Web app Pentesting
- AD Hardening
- Gap Analysis
- Security Operations
- networking
- Hardware maintenance
- THM, HTB
- OSINT
- Dev/Review Policies

TOOLS

- Kali Linux
- Wireshark
- VM Ware
- SQLmap
- Burp suite
- Fuzzers
- Nessus
- nuclie
- Nmap
- Netcat
- Hydra
- testssl
- OWASP Zap proxy
- Metasploit
- Nikto
- Sub domain finders

PROJECTS

- IoT Dashboard Scanner & Vulnerability Analyzer - Developed a tool to scan IoT interfaces and assess vulnerabilities using Python, Flask, and HTML.
- Honeypot-based Network Security - Built a dynamic honeypot system to detect intrusions and automate firewall updates using Python, iptables and ids.
- Turf Finding Web Application - Created a web application to manage and book sports turfs using PHP and MySQL.
